Worth farming for legendary drops.

Wandering Death Rewards

Grand Cache · Legendary gear · Cosmetics · Mount armor · Trophy · Seasonal reward

Worth farming for the unique trophy.

How the Diablo 4 World Boss Timer Works

How We Calculate the Next World Boss Spawn

The timer uses the known world boss rotation cycle (approximately every 3.5 hours) combined with community-verified spawn times to predict the next spawn. Confirmed times are manually reviewed or corrected by our team.

Predicted vs Confirmed Spawn Times

Predicted times are generated from the rotation algorithm. Confirmed times have been manually verified. Needs verification means the anchor time requires community input.

Diablo 4 World Boss FAQ

When is the next World Boss in Diablo 4?

The next World Boss is shown in the timer card at the top of the page. It includes the boss name, live countdown, local spawn time, region, location, nearest waypoint, and confidence status.

How often do World Bosses spawn in Diablo 4?

The timer uses a 210-minute, or 3.5-hour, interval as the default prediction rule. Future events are still labeled by confidence status because seasonal updates or special events may affect the schedule.

Where do World Bosses spawn in Diablo 4?

World Bosses spawn in fixed arena locations across Sanctuary, including Fractured Peaks, Scosglen, Dry Steppes, Kehjistan, and Hawezar. The locations section shows the current spawn point, region, nearby waypoint, and map option.

Is this Diablo 4 World Boss Timer accurate?

This Diablo 4 World Boss Timer is designed to be transparent rather than overpromise. Confirmed events have been reviewed, Predicted events are generated from the current rotation logic, and Needs verification events should be checked before you rely on them.

Can I get a reminder before a World Boss spawns?

Yes. The reminder panel can support warning times such as 5, 15, 30, or 60 minutes before the event. Browser notification permission should only be requested after you choose a reminder.

Does the timer show my local time?

Yes. Event times are stored in UTC and converted in your browser so the timer can show the next spawn in your local timezone.

What do World Bosses drop in Diablo 4?

World Bosses may drop Grand Caches, legendary gear, cosmetics, mount armor, trophies, and seasonal rewards. The rewards section gives a quick overview so you can decide whether the next event is worth joining.

This is an unofficial fan-made Diablo 4 tool. Diablo IV and related names, images, and assets belong to Blizzard Entertainment. This site is not affiliated with or endorsed by Blizzard Entertainment.

Required P0 Interaction States

- 1. Confirmed**
Green chip: 'Confirmed'. Method note says manually reviewed. Keep Report Wrong Time de-emphasized.
- 2. Predicted**
Amber chip: 'Predicted'. Copy: 'Generated from the current rotation.' Show last updated and report entry.
- 3. Needs verification**
Red chip: 'Needs verification'. Short warning below time. Promote Report Wrong Time. Caution copy on reminder.
- 4. API Loading**
Skeleton blocks for boss, countdown, time, schedule rows. Label: 'Loading next spawn...'. Do NOT show fake countdown.
- 5. Current API Failed**
Timer Card error: 'Unable to load the next World Boss.' Show Retry. If last known event, label 'Last known'.
- 6. Schedule API Failed**
Schedule panel: 'Upcoming schedule could not load.' Show 'Retry schedule'. Keep Timer Card functional.
- 7. No Active Anchor**
Empty Timer Card: 'Schedule anchor needs verification.' Hide countdown. Show UTC/server time if available. Show report entry.
- 8. No Future Events**
Empty schedule: 'No upcoming World Boss events are available yet.' Show retry and accuracy note.
- 9. Event Expired / Checking Next**
Replace countdown: 'Checking next World Boss spawn...'. NEVER show negative numbers. Re-fetch current mock. Retain previous location with muted style.
- 10. Timezone Detection Failed**
Local time row becomes 'UTC time shown'. Warning chip: 'Timezone unavailable'. Provide compact timezone select placeholder.
- 11. Notification Unsupported**
Reminder panel disables browser notification option. Confirm local reminder intent only. Do not request permission.
- 12. Notification Denied**
Warning: 'Notifications are blocked in this browser.' Keep reminder intent saved locally. Suggest device alarm in copy.
- 13. Report Submitted**
Success banner: 'Report submitted. Thanks - we will review this event.' Close form after delay or keep 'Submit another report'.
- 14. Stale Data / Announcement**
Stale: 'Data may be outdated' label near last updated. Show Refresh button or auto-retry. Announcement: compact banner below header with dismissible message.

Required Mock Variants

mockCurrentResponse; confirmedCurrentResponse; needsVerificationCurrentResponse; mockScheduleResponse with 8 events; noActiveAnchorResponse; noFutureEventsResponse; currentApiFailedState; scheduleApiFailedState; eventExpiredCheckingState; announcementActiveResponse.

SEO + Structured Data

Locked title/description/OG/Twitter metadata. Heading tree follows SEO Plan v1. JSON-LD required: FAQPage, BreadcrumbList, WebApplication. Body exact-match target: 4-6 appearances of Diablo 4 World Boss Timer.

Accessibility + Motion

Keyboard-accessible controls; aria-live countdown announced sparingly; focus trap and return for menu/dialog; labeled form fields; non-color-only confidence labels; map button announces expanded state; prefers-reduced-motion respected.

Analytics Events

view_timer_page; return_visit_timer_page; click_remind_me; select_reminder_5/15/30/60min; click_view_map; expand_schedule; click_report_wrong_time; submit_error_report; faq_expand.

Countdown Stability

Countdown nodes represent --wb-font-mono in implementation; ui-monospace/SFMono/Menlo/Consolas stack plus font-variant-numeric; tabular-nums. No negative letter-spacing; no per-second animation.

Tablet Behavior

768-1023px remains single-column. Timer card full width. Schedule may become two-column cards only if text fits. Rewards can become a 3-card grid at 768px.

Route note: Ride northwest from Corbach and enter the arena from the southern path.

Report Wrong Time Dialog

P0 report flow: report type is required, note is optional up to 500 characters, submission uses the shared WorldBossReportPayload contract.

Default

Report an incorrect World Boss time, boss, location, notification issue, or other problem.

Select report type

Optional note

Tell us what looked wrong. Max 500 characters.

Submit Report

Validation / API Error

Report type is required.

Choose Wrong time, Wrong boss, Wrong location, Notification issue, or Other before submitting.

Failed to submit report. Please try again.

Network and API failures keep the form state intact and expose Retry.

 Retry Submit

Report Submitted

Report submitted. Thanks - we will review this event.

Keep the dialog open with Submit another report, or close it after a short delay and return focus to Report Wrong Time.

Submit Another Report

P0 State Variants

Visual reference for required fallback and interaction states. These are compact component variants, not full pages.

API Loading

[Placeholder]

[Placeholder]

[Placeholder]

Loading next spawn... no fake countdown shown.

Current API Failed

Unable to load the next World Boss.

Last known event can stay visible but must be labeled Last known.

Retry

No Active Anchor

Schedule anchor needs verification.

Countdown is hidden. Show server UTC time and report entry.

Schedule API Failed

Upcoming schedule could not load.

Keep Timer Card functional. Show Retry schedule.

Retry schedule

No Future Events

No upcoming World Boss events are available yet.

Show retry and accuracy note. Do not invent events.

Timezone Detection Failed

Timezone unavailable

UTC time shown. Provide compact timezone select placeholder for future implementation.

Notification Denied

Notifications are blocked in this browser.

Keep reminder intent saved locally and suggest using a device alarm.

P0 Interaction States Patch

Missing visual states required before implementation: countdown rollover, notification support, map lazy loading, mobile menu, announcement, stale data, and reminder local-intent flow.

Event Expired / Checking Next

Trigger: countdown reaches 00:00 before fresh current event arrives.

Checking next World Boss spawn...

Never show negative countdown. Keep previous boss/location muted until refetch resolves.

Notification Unsupported

Browser notification option is disabled when Notification API is unavailable. P0 still saves local reminder intent.

Browser notifications unavailable

Stale Data Indicator

Stale data

If generated_at exceeds stale_after_seconds, keep last known event visible, show warning, and offer Retry.

Announcement Active

 Spawn timing advisory: verify this event before relying on it.

Use announcement.enabled/message from CurrentEventResponse. Dismissable in UI, not counted as public SEO copy.

Map Closed / Lazy by Default

Text directions stay visible. No Iframe, image, or dynamic map module renders before user clicks View Map.

 View Map

Map Loading

Announce loading politely. Keep route note visible below the map panel.

Map Failed

Map could not load.

Use the text route: Ride northwest from Corbach and enter the arena from the southern path.

Retry Map

Mobile Menu Open

D4 Boss Timer

Schedule

Locations

Rewards

FAQ

Remind Me

Focus trap inside menu. Escape closes. Links close menu after anchor navigation.

Reminder Panel States

P0 records local intent only. Browser notification scheduling and iCal export stay P1, but permission UX must be designed.

5 min

15 min

30 min

60 min

 Checking notification support...

 Reminder saved locally for this browser session.

Accessibility + Motion Notes

Countdown: aria-live=polite, tabular nums, no negative values, recalibrate on visibilitychange.

Dialog/menu: focus trap, Escape closes, visible focus ring uses gold token.

Status chips must include text labels; never rely on color alone.

Map and notification state changes announce politely. Respect prefers-reduced-motion.

Suggested waypoint: Corbach

Route note remains text-first. Map lazy behind View Map.

Timer Accuracy

Predicted

Updated 2m ago

Timezone: America/New_York

Source: algorithm | S13

Ashava Rewards

Grand Cache, mount armor, trophy, seasonal notes.

Avarice Rewards

Legendary gear, cosmetics, farming note.

Wandering Death Rewards

Grand Cache, trophy, seasonal reward note.

Implementation Handoff Checklist

Non-visual requirements that must travel with the Pencil draft: SEO copy, structured data, exact DTO mocks, analytics events, and QA acceptance checks.

SEO Content

Public rendered body: 850-1,000 words. Keep first viewport compact; place crawlable content below tool modules.

Exact match target: 'Diablo 4 World Boss Timer' appears 4-6 times in body/headings only.

Locked title/meta: Next Spawn, Schedule & Locations. One H1 only.

Structured Data

FAQPage JSON-LD: questions and answers must match rendered FAQ copy.

BreadcrumbList JSON-LD: Home > Diablo 4 World Boss Timer.

WebApplication JSON-LD: tool name, URL, applicationCategory, operatingSystem=Any.

Mock DTO Fixtures

Use exact Implementation Lock types; WorldBossEventDto, CurrentEventResponse, WorldBossScheduleResponse, WorldBossReportPayload, ApiErrorResponse.

Derived only in frontend: spawn_time_local, countdown_seconds, formatted countdown, timezone label.

Fixture variants: confirmed, predicted, needs verification, no anchor, no future events, stale, announcement, API errors.

Analytics P0

Events: page_view, remind_open, reminder_saved, view_map_click, report_open, report_submit, schedule_retry, faq_expand.

Payload: event_id, boss_slug, confidence_status, source_type, viewport class, timezone status. No PII.

Automated QA

360x640: header/title, boss, countdown, local time, location/region, confidence, Remind Me visible.

Countdown updates once per second, recalibrates on visibilitychange, never negative.

Map not loaded before View Map. FAQ present in HTML. One H1. No internal notes rendered.

Copy Guardrails

Use Homepage Copy v2 public copy. Do not render publishing notes or internal implementation notes.

Avoid 'official', 'guaranteed', or '100% accurate'. Use Confirmed, Predicted, Needs verification.

Disclaimer text must render exactly near footer.

Contract Boundaries

P0 UI draft only: no backend, database, Supabase, Cron, admin, or production API logic in Pencil scope.

Do not hardcode production boss/location rotation in presentational components.

Reminder P0: local intent only. Real browser scheduling, iCal, Discord, Telegram, PWA are P1+.

Typography Note

Implementation uses system stack only. Pencil may show Arial/Courier as visual fallback; CSS tokens remain source of truth.

Countdown CSS: ui-monospace stack, font-variant-numeric: tabular-nums, letter-spacing: 0, line-height: 0.95.

No viewport-scaled type. Cards/buttons radius max 8px except small status pills.

P0 Links + Routing

Route: /diablo-4-world-boss-timer/. P0 nav uses page anchors for Schedule, Locations, Rewards, FAQ.

Replace anchors with real internal links after P1 schedule/location pages launch.

Canonical self-references target page; sitemap/robots are production QA items.
